Formliners

More Patterns... More Possibilities!

Formliners can make a lasting impression in concrete at an affordable price. And American Formliners has the project experience, pattern recommendations and material options to make sure every cast-in-place, tilt-up or precast application is successful.

American Formliners has the patterns, including brick, rope, fractured fin, wood grain and most DOT textures, that will complement almost any concrete structure. These patterns are being specified by architectural/engineering firms and state Departments of Transportation, and installed by concrete contractors throughout North America every day.

American Formliners provides several advantages:

- State-of-the-art manufacturing
- Single-use and multi-use material options
- Hard-to-find pattern lengths for versatility
- Edge-to-edge match for seamless appearance
- Cost-effective pricing and nationwide availability
- Custom capability for unique applications

Surface details are permanently molded into the formliner material during production, resulting in a consistent concrete appearance.

Geometric and high-relief textures are reproduced with single-use HIPS plastic, medium-use ABS plastic or extended-use urethane materials.

Formliners are used in cast-in-place, precast or tilt-up forming. HIPS and ABS plastic materials can be installed using screws or staples. Urethane materials are typically plywood-mounted with adhesive and subsequently bolted to formwork.

Thermoform

HIPS - High Impact Polystyrene

HIPS Formliners can be used to provide a textured concrete surface, in a limited application, at an affordable price. Single use only.

ABS - Acrylonitrile Butadiene Styrene

ABS Formliners exhibit impact resistance and UV shielding to reduce the damaging effects of sunlight. Multiple uses up to 10 times.

Elastomeric

PE - Polyurethane Elastomer

PE Formliners combine great resilience and high-tensile strength into a long-wearing surface. Multiple uses up to 40-50 times.

PPE - Premium Polyurethane Elastomer

PPE Formliners provide exceptional reproduction of the most difficult and complex designs for a consistent appearance. Multiple uses up to 100+ times.
